European Patent Application No. 01 112 618.2 Title: Method and apparatus for position detection Honda Giken Kogyo Kabushiki Kaisha

Dear Mr. Shiga:

With reference to our letter dated Sep 14, 2004 we have now received the complete search report of the EPO, copy of which is enclosed. Copies of the publications considered to be relevant are also enclosed.

We recommend that the references for categories X and Y - if any - be examined carefully. This can be of importance for the later decision whether examination should be requested or, in case it has already been requested, whether it should be maintained.

In the annex to the search report the corresponding printed patent specifications in other countries are indicated for the cited printed patent specifications.

Please note that the present search report has been drawn up for all claims.

We further advise you that the EPO approved the following items:

(089) 45563 0 (0700) WEICKMAN (089) 45563 999

LACK OF UNITY OF INVENTION SHEET B

EP 01 11 2618

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1, 6, 11

Eliminating moving reference points from the position calculation

2. claims: 2,7,12

Reducing the effect of variations in distance data obtained from images in the process of determining the position

3. claims: 3,4,8,9,13,14

Increasing the accuracy of the calculation of the position by using only the reference characteristic points whose positions are known with most certainty

4. claims: 5,10,15

Enabling the calculation of a position in cases when a geometric calculation of position is not possible
